3, Herrania laciniifolia Goudot mss.

Peñon de Conejo (Goudot).

Obs. - Sous le nom manuscrit de Herrania laciniifolia (Goudot), l'herbier du Muséum renferme les feuilles d'une plante récoltée par Goudot, a Peñon de Conejo, dans la vallée du Magdalena. Cette espèce qui, suivant toute apparence, rentre en effet dans le genra Herrania, est remarquable par ses folioles plus ou moins découpées en lobes triangulaires ce qui leur donne une ressemblance avec les feuilles de Carica Papaya et de diverses Araliacées.

[Ann. Sci. Nat. IV Bot. 17: 337. 1862]
